

## **Abstract of the Disclosure**

1        A player makes a wager on a first round of video poker.  
2        If the player achieves a winning hand combination on the  
3        first round of video poker, the player is offered the  
4        opportunity to play one or more hands of video poker against  
5        a higher pay table on the next round of video poker. The  
6        player may continue to play against the higher pay table as  
7        long as the player continues to achieve winning combinations  
8        during each round of play. If the player fails to achieve a  
9        winning combination during a round of play, the game resets  
10       to the initial lower pay table and the player starts over.
